

PEERLESS® GEAR

Your Transmission Solution

Made in the USA Since 1945

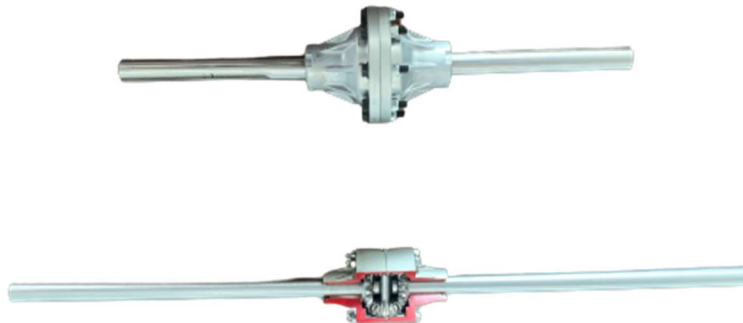

PRESS RELEASE: New Heavy-Duty Differential

Date: July 27, 2023

Peerless Gear is pleased to announce the release of our NEW 110 series differential.

This new unit complements the current family of differentials produced by Peerless Gear over the past 50+ years. The unit design increases both torque and horsepower capabilities over the current product. This new 110 series was created to meet customer requests for a differential capable of increased horsepower/torque and weight capacity required by new electric drive equipment, racing go-karts, and utility vehicles.

Pictured below are the standard 100 Series (3/4" or 1" axles) and the 110 Series (1" axle), eight bolt carrier with reinforced housing for strength.

For more information contact us at oemsales.peerless@peerlessgear.com North America or dean.swansborough@peerlessgear.com for International. Additional information can also be found on our website @ www.peerlessgear.com

Peerless Gear has been proudly producing drivetrain products in the USA since 1945. Our products are designed to meet OEM Customer needs in the commercial, recreational, industrial, residential, and drivetrain market.
